DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Loh et al. (US Pat. No. 5,516,707), previously cited.

Regarding claim 10, Loh et al. teaches a method for manufacturing a semiconductor device comprising: forming a gate oxide film (35) on a substrate (20) (see Fig. 1); forming a gate electrode pattern (26) (see Fig. 1), forming diffusion regions (21, 22) (see Fig. 1); and implanting N atoms (50) after the step of forming the diffusion regions, such that said N atoms do not reach said substrate (see Fig. 2). With regards to the claimed acceleration voltage and dose, Loh et al. does not restrict the invention to a specific acceleration voltage and dose. As a matter of fact, Loh et al. teaches that the invention "can be optimized by controlling the implant dose, energy and tilted angle" (see col. 3, lines 13-30). Thus, it would have been obvious to one of ordinary skill in the art to incorporate nitrogen in a gate oxide by implanting nitrogen ions under an acceleration voltage or energy not exceeding 10 keV and a dose of $1-3 \times 10^{14} \text{ cm}^{-2}$, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or working ranges involves only routine skill in the art.

In re Huang, 40 USPQ2d 1685,1688(Fed. Cir. 1996) citing *In re Aller*, 105 USPQ 233., 235 (CCPA 1955).

Allowable Subject Matter

- Claims 6 and 15-16 are allowed.

Response to Arguments

- Applicant's arguments with respect to claim 10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

- Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
